

Air 1 Radio serves me as a resident in my local community by telling me of local church events and concerts in my area. If Air 1 were displaced by an LPFM broadcaster there would be no other station we could listen to that provided the same format and genre of music in the area. There is literally NO other station providing this type of music in our area. Air 1 does not air commercials and is totally listener supported - I think that is the definition of being in the public interest.

Please do not boot Air 1 off the air in favor of a LPFM station.
